PRACTICAL ASSESSMENT MARKING SCHEDULE 3B

Student Name

Initial assessment / Reassessment

Date: / /

Bony landmarks & Muscle shapes, extents and primary action(s)

Student identifies the location of the structure to be identified on the body by placing their finger on the body. The finger must be within 1cm of the true location of the structure.

| Bony landmarks | Located (✓/✗) |
|------------------------------------|------------------|
| Head of fibula | |
| Lateral condyle of tibia | |
| Tibial tuberosity | |
| Lateral condyle of femur | |
| Lesser trochanter of femur | |
| Linea aspera of femur | |
| Greater trochanter of femur | |

| Muscle shapes and actions | Shapes & extent (✓/✗) | Primary action(s) (✓/✗) |
|---------------------------|--------------------------|----------------------------|
| Gluteus minimus | | |
| Gluteus maximus | | |
| Soleus | | |
| Peroneus longus | | |
| Semimembranosus | | |
| Biceps femoris | | |
| Vastus medialis | | |

Competent / Not competent [Competency = 5/7]

Marks towards a merit: [Any marks above 5]

Total marks towards a merit: / 4

Competent / Not competent [Competency = 5/7]

Marks towards a merit: [Any marks above 5]
